

Bath Limited

INDEPENDENT CONSULTING FROM BATH

Digital done *well.*

We're a small consultancy in Bath. We look after the platforms and devices your organisation depends on, and we design and build the software that runs on top.

PL. I — *The Circus & the Royal Crescent, Bath · 51.386° N · 2.365° W*

THE FIRM

Bath Limited is a small, independent consultancy in Batheaston, just outside the city. We look after endpoint, cloud and software — and if it's plugged in, we probably know how to look after it.

THIS NUMBER

How we approach an engagement; the three things we do; an estimate worked in full; and the rate that covers it all — £750 the consultant-day. No retainers, no minimums, no small print.

IN THIS NUMBER

§ 01 · Our approach	2	§ 04 · One rate	3
§ 02 · What we do	2	§ 05 · About us	4
§ 03 · The estimator, worked	3	§ 06 · Getting in touch	4

OUR APPROACH

§ 01

Do good work
for good people.

In practice, that means listening before recommending, learning how your organisation actually runs, and proposing what fits you rather than what suits us.

We don't have a house style or a preferred answer. What's right for one organisation may be wrong for another, and our job is to know the difference.

WHAT WE DO

§ 02

Three things, done properly.

All three, by the same hands.

01 —
MANAGE

Endpoint & mobility.

The devices your people work on, kept healthy and secure across macOS, Windows, iOS and Android — from enrolment to the unglamorous business of keeping a fleet in good order.

- i Device & platform management (MDM)
- ii Enrolment, configuration & rollout
- iii Endpoint security & compliance baselines

02 — RUN

Cloud & infrastructure.

The platforms your organisation runs on. We set up, secure and migrate Microsoft 365 and Azure — identity, email, files and calls — and keep the whole estate resilient.

- i Microsoft 365 & Azure
- ii Identity & access — Entra ID, single sign-on, multi-factor authentication
- iii Migrations, security & business continuity
- iv Teams Phone & calling

03 — BUILD

Web & app development.

We design and build production web applications end to end — interface, back end, data and deployment. Increasingly that includes data platforms, and applied AI where it earns its place.

- i Product design & interface
- ii Front-end & back-end build
- iii Data models, APIs & deployment
- iv Data platforms & applied AI

ACROSS
ALL
THREE

Advice on your strategy and migrations, with nothing riding on the answer. We stay hands-on for as long as we're useful, and step back the moment you're ready to take over.

THE ESTIMATOR

§ 03

Estimate an engagement.

A working example of the sort of thing we build. Choose a track and the areas you have in mind; we'll sketch the days and what they would cost. It's a guide, not a quote; the real number follows a conversation.

A WORKED EXAMPLE

Suppose an endpoint engagement, taken from audit to steady state: a fleet audit to see what you actually have, device management set up properly on top, and the extras most engagements grow — a security and compliance baseline, a careful rollout, and the documentation to run it all without us.

Cloud and software engagements price the same way — by the day, from the same rate, with the working shown before anything begins.

Tick what applies; rough is fine. The interactive estimator — tracks, half-day nudges and all — lives at bath.limited.

THE WORKING *Endpoint & mobility*

Fleet audit & discovery	1 d
Device management (MDM) setup	2 d
Security & compliance baseline	2 d
Rollout & user enrolment	2 d
Documentation & handover	1 d

8 days × £750 **£6,000**
indicative, before a conversation

ONE RATE

§ 04

£750 per consultant-day.

A day is 7.5 hours, billed in half-day increments. You'll always know what you're paying for before we begin.

No retainers.

No minimums.

No small print.

ABOUT US

§ 05

We do the work ourselves.

Bath Limited is an independent consultancy in Batheaston, just outside the city. Whoever scopes a job carries it out, and still knows how it was put together two years on.

We've spent years keeping fleets of devices and cloud platforms healthy for organisations that can't afford for them not to be. We bring the same care to the software we design and build — considered, quietly robust and made to fit the way you work.

PL. II — Batheaston, on the River Avon · 51.390° N · 2.351° W

“Technology should make you more capable. Most of it just makes you busier.”

GET IN TOUCH

§ 06

Tell us a little about it.

A line or two is plenty to start. We read every enquiry ourselves and reply within a working day, usually sooner.
